AFS/CMI Education

The AFS BC Chapter needs your input on a choice for our Winter CMI course to be held in January 2013. Please review the following list of available CMI lecture courses and let us know which course(s) you’d like to have held locally. Email Brian Palm or Kyle Martin and let them know.

CONTACT:  Brian Palm: brian.palm@robar.ca or Kyle Martin: kyle@pacmak.com

Analysis & Reduction of Casting Defects  Basic Blueprint Interpretation for Metalcasters
Casting Cost Estimating  Cupola Melting for Operators
Chemically Bonded Molding & Coremaking Materials & Methods  Cupola Melting for Engineers
Ductile Iron Workshop  Effective use of Coldbox Process
Effective use of Nobake Binders  Foundry Leadership Skills Workshop
Gating & Feeding of Investment Castings  Gating & Riser Design
Geometric Dimensioning & Tolerancing  Induction Melting Operations
Inoculation Principles of Gray & Ductile Iron  Introduction to Metalcasting
Melt Control of Nickel, Cobalt, & Stainless Steels  Metallurgy of Aluminum Casting Alloys
Metallurgy of Cast Steel  Metallurgy of Copper – Base Casting Alloys
Metallurgy of Gray & Ductile Iron  Nonferrous Melting Technology & Practices
Permanent Mold Coating Fundamentals – Aluminum  Practical Green Sand Control
Statistical Process Control for Metalcasters  Vertical Gating Design
Statistical Design of Experiments

SAFETY IN THE WORKPLACE—Have you heard about GHS yet?

WHMIS TO GHS IS COMING. GET READY!

As the world shifts its attention to workplace safety, global standards are being developed to ensure there is a consistent level of safety communication between different countries. Canada is currently using WHMIS for its hazardous materials communication system, but there’s a new player coming to town.

The Globally Harmonized System for Classification and Labeling of Chemicals (GHS) is a hazardous materials communication system that will standardize hazardous materials management around the world. GHS ensures that the safe communication of hazardous materials is consistent between different countries, and protects workers who may handle these materials. Canada is expected to adopt GHS in the near future and your company is required to participate.

While Canada hasn’t officially adopted GHS, other countries – such as the USA – have. This is important for your company to know if you plan on exporting or importing any controlled products. Countries which have adopted GHS will require certain elements in the classification, labelling, and safety data sheet (SDS) of the controlled product. SDSs have already begun to appear in Canada and workers require proper education in the new SDS requirements (see the CCOHS link at the end for more details).

Although GHS has not been officially adopted, some of its elements are already here in Canada and they require your attention.

WHERE TO GET INFORMATION:
Canadian Centre for Occupational Health and Safety’s (CCOHS) GHS website—http://www.ccohs.ca/oshanswers/chemicals/ghs.html

2012 Make It Safe Conference, Sept. 18 to 21, 2012, Burnaby, BC  For more information visit www.makeitsafe.ca
Letters to the Editor:

Have an idea for an article in the newsletter? Want to publicly thank someone in the industry? Have a funny tale you’d like to share?

Send your submissions to me today!
